

GENERATOR STATUS INFORMATION DISPLAY FOR  
POWER TRANSFER SWITCH  
ABSTRACT

- A power transfer arrangement is provided for supplying power from a
- 5 generator to the electrical system of a building in the event of a utility power interruption. The power transfer arrangement has a power transfer switching mechanism adapted for interconnection with the building electrical system and includes a cabinet having panel structure provided with various electrical components for transferring power to various load circuits. The power transfer
- 10 arrangement is improved by a generator status information display mounted on the cabinet for separately measuring and simultaneously displaying actual wattage and voltage supplied by the generator to the load circuits.
